

## Circular Notice

**Date: 5 June 2023**

**To:** All Staff and Students

**Subject:** Go Green at Harivandana College

Harivandana College is committed to creating a sustainable campus environment. To achieve this, we are implementing a comprehensive waste management plan that involves the active participation of all staff and students.

### Key components of the plan include:

- **Segregation at Source:**
  - Dry Waste: Paper, plastic, glass, metal, e-waste (batteries, electronics)
  - Wet Waste: Food waste, biodegradable materials (leaves, twigs)
  - Hazardous Waste: Chemical waste (from labs), used batteries, fluorescent tubes
- **Designated Collection Points:** Clearly marked bins for each waste category will be placed throughout the campus.
- **Recycling and Composting:** Dry waste will be recycled through authorized vendors, while organic waste will be composted on-campus to create nutrient-rich soil for the college garden.
- **Awareness and Training:** Regular workshops and campaigns will be conducted to educate the college community about waste management practices.
- **Minimization of Waste:** The college will promote the use of reusable items, reduce paper consumption, and organize events to raise awareness about waste reduction.

### We urge everyone to:

- Actively participate in waste segregation efforts.
- Use the designated bins appropriately.
- Avoid littering on campus.
- Support and participate in waste management initiatives.

By working together, we can make a significant impact on environmental sustainability and create a cleaner, greener campus for future generations.
